AAPA to Host Asia Pacific Aviation Safety Seminar in Manila

Kuala Lumpur, Malaysia – In partnership with Philippine Airlines, the Association of Asia Pacific Airlines (AAPA) is pleased to announce that the **Asia Pacific Aviation Safety Seminar** will be held on **10-11 September 2025** at the **Hilton Manila**.

The Asia Pacific Aviation Safety Seminar, APASS, is AAPA's premier safety forum for the Asia Pacific's airline community, bringing together safety professionals from across the region, including AAPA member airlines, regulators, manufacturers, maintenance and repair organisations (MRO) and solution providers.

The theme for **APASS 2025, SAFETY WITHOUT BORDERS: GLOBAL PARTNERSHIPS, LOCAL IMPACT** centres on operational resilience, human factors, safety leadership, and risks arising from technology as well as evolving airspace threats, including spoofing, fatigue management and data integration.

“As aviation safety challenges grow in complexity, our collective commitment to collaboration, data sharing and cross-disciplinary learning becomes even more critical,” said **Subhas Menon**, Director General of AAPA. *“APASS 2025 will offer a unique opportunity for the Asia Pacific safety community to address high-priority safety concerns and strengthen alignment across safety domains. We are proud to partner with Philippine Airlines to host this important event in Manila.”*

AAPA extends a warm invitation to all aviation safety stakeholders in the Asia Pacific and beyond to participate in this landmark seminar, and to work together towards a safer, more secure and sustainable aviation future.

Association of Asia Pacific Airlines (AAPA)

The AAPA is the trade association for scheduled international airlines based in the Asia Pacific region. The AAPA permanent secretariat is headquartered in Kuala Lumpur, Malaysia with international representation in Brussels and Washington, D.C. Collectively, the region's airlines represent over one-third of global passenger and air cargo traffic, and thus play a leading role in the ongoing development of global aviation.
